A Little About Me

A passionate frontend && backend developer
(HTML, JAVASCRIPT, CSS, PHP) .

PROJECTS

TeleDomoFarm: The TeleDomoFarm project focuses on implementing an agricultural management system based on the Internet of Things (IoT) and home automation. The goal is to optimize the efficiency and control of a farm by automating and monitoring various agricultural processes. By utilizing advanced technologies such as IoT devices, SaaS systems, and sensors, the project aims to improve energy management, security, comfort, and accessibility in the agricultural environment, allowing for real-time monitoring and remote resource management.

Porrlanas : I developed an e-commerce virtual store project using technologies such as CSS, HTML, JavaScript, Django, and PHP. The system includes billing functionality and a CRUD (Create, Read, Update, Delete) that allows efficient product management. Users can upload, modify, update, and delete products according to their purchasing needs.

SKILLS

Programming Language : Javascript, CSS, HTML, SQL, Python.

Frameworks: PHP, Django

OS - Ubuntu, Linux, Windows

Tools : Git, GitLab, Vscode

EDUCATION

Catholic University of Colombia

(April 2017-June 2024)

LANGUAGES

English, Spanish.
